

Sunset

Madison VonNeida

UNEDITED:

This is a picture taken outside in the evening. The main point is the sunset, but is easily overlooked since it is vertical and there is a telephone pole that is an eyesore.

EDITED:

Using the clone tool, the telephone pole was erased. To bring the focus to the sunset, the auto color correction options and clicked the, "Find dark and light options". The composition of this photo is symmetry.

Pumpkin

UNEDITED:

This is a picture taken outside in the morning. This is a cute harvest decoration with several issues. First, there is no place your eyes are drawn to.

EDITED:

First, the clone tool was used to add a pumpkin. Then, the photo was cropped, making the new pumpkin the main point of focus. The photo was cropped with the rule of thirds in mind. After cropping, the clone tool was used to remove one of the black bars. Increasing the contrast makes the pumpkins pop and for it to look more like fall.

Giraffe

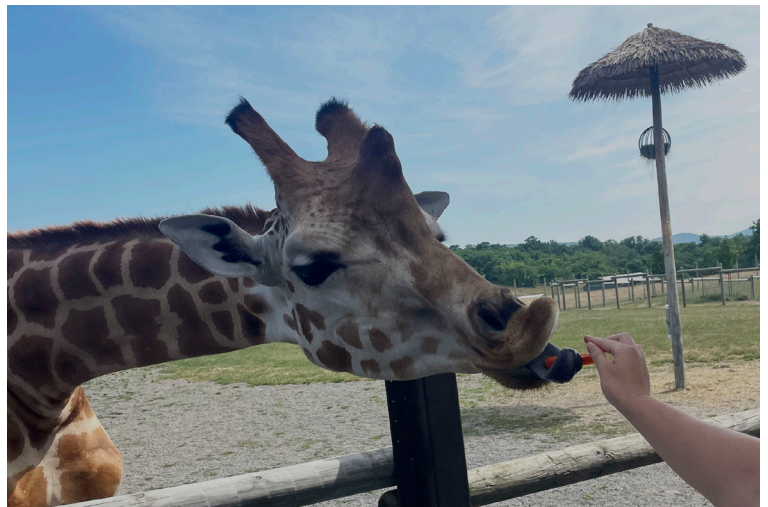

UNEDITED:

This is a picture taken outside during the day. The main goal of this photo was to get a shot of the giraffes tongue, which is accomplished. The composition of this photo is centered.

EDITED:

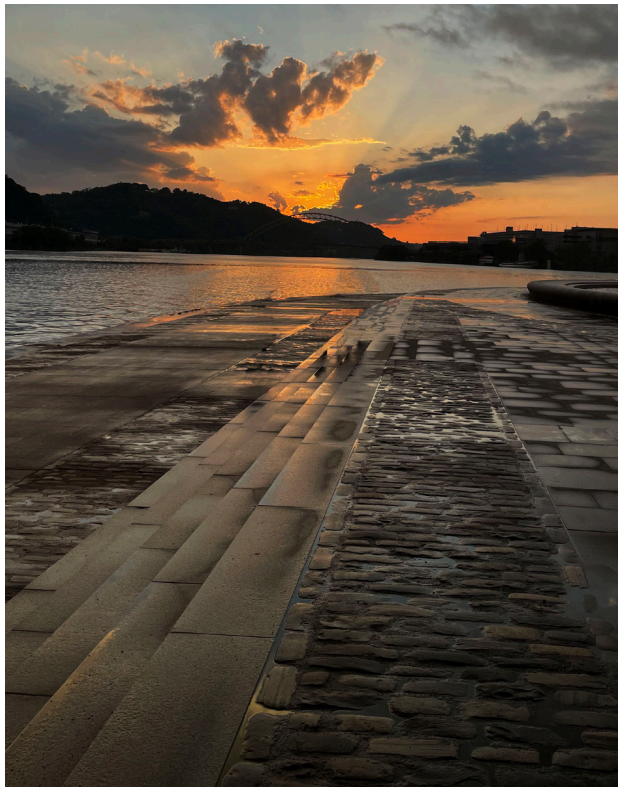

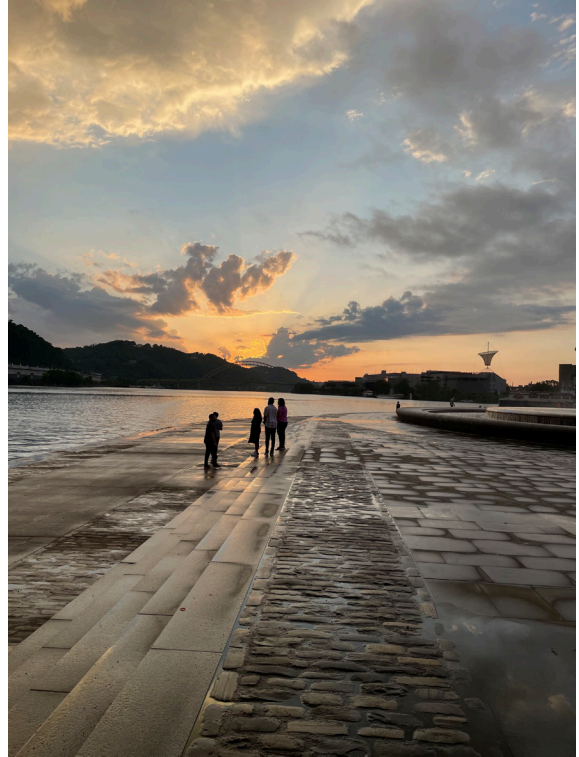

The photo was cropped first, centering the giraffes face. Using the clone tool, the bracelet was erased on the hand. The brightness was increased and decreased the exposure for the final product.

Lake

UNEDITED:

This picture was taken outside by a lake. The picture looks nice, but there are people in the way. The composition of this photo is the leading lines.

EDITED:

The curve brightness was lowered. Using the clone stamp tool, the people were erased from the photo. The revised photo is still using leading lines, pointing in the direction of the sunset.

Pancake

UNEDITED:

This picture was taken inside at a restaraunt of a pancake. The picture is centered, but bland.

EDITED:

The revised picture is cropped with a new composition using the rule of thirds. Also, the exposure was lowered as well as the gamma correction. The clone tool was also used to erase a few of the holes.
